

# International Practicum on Accreditation and Quality Improvement

Begin your accreditation journey here

## For unaccredited organizations considering accreditation or preparing for an initial survey.

Attend this five-day comprehensive program to understand the tangible benefits of JCI accreditation and explore the staff, time, and commitment needed to achieve *Gold Seal of Approval*® success.

### Prepare for your trip

Experienced faculty lead you through accreditation preparation by explaining JCI's comprehensive standards and the process to achieve compliance, including an overview of the changes in JCI's 6th edition hospital and 4th edition ambulatory care standards.

### Navigate the accreditation process

Through small-group workshops and lectures, you will learn the JCI accreditation process, methodologies to evaluate compliance, quality improvement strategies, and tactics to meet the most challenging standards.

### Focus on the details

Follow a JCI expert on simulated tracers in local hospitals to see the survey process in action. Then receive your complimentary electronic\* copy of the 6th edition of JCI's Accreditation Standards for Hospitals (and Academic Medical Centers) and 4th edition Accreditation Standards for Ambulatory Care Organizations to use as a roadmap for compliance success.

\*JCI Education events are paperless, with content provided via an electronic application (app). Access to the app will be granted approximately 10-14 days prior to the event.
